

## WELCOME TO DEFRAG OHIO. WELCOME TO THE FUTURE!

*Defrag is an international business network focused on next generation industry opportunities in digital media*

### *About Defrag*

Defrag Ohio presents quarterly conferences and identifies and connects (aka “de-fragments”) resources and capabilities in digital media to advance our state's participation in the multi-trillion dollar global industry. Digital media is defined broadly as any digitally-engaged business or application. Some examples are modeling, simulation and 3-D visualization. Technology, art, science, manufacturing, business development, and investment specialists come together in open interactive conversations to present, discuss and develop next steps for new business growth in Ohio.

Defrag Ohio builds open, transparent and creative communities attracting industry professionals in design, technology, manufacturing, medical, communications, business management and venture investment. Through this community it leverages new principles and practices for Open Source Economic Development. The Defrag Ohio network models collaborative leadership skills and builds social networks to share information quickly so we can spot opportunities faster and link resources and capabilities for new projects and business development in a process called Strategic Doing.

### *As a sponsor you will get:*

- ◆ Exposure with up-scale executives and emerging entrepreneurs in technology, creative arts, communications and manufacturing in digital media
- ◆ Logo display on Conference Web Home Page with a link to your site
- ◆ Logo on front or top of Conference Program Schedule (on-line and in print)
